

With ROOMZ, not only are the workplaces at isolutions smart, so are the meeting rooms.

Future-oriented working world

The IT service provider, isolutions, is specialized in the provision of solutions based on the Microsoft Office 365 product palette, SharePoint, Dynamics 365 and Azure. Their solutions are well received: the Microsoft Cloud partner is expanding and therefore recently moved into new, modern offices in the PostParc business complex in Bern, which meets all the requirements for a digital working world. The company also has offices in Zurich and Basel in close proximity to its customers.

INITIAL POSITION

As a trailblazer in the digital world, isolutions promotes cooperation with the latest collaboration tools. Despite the enthusiasm for digitalization, analogue interchanges should nevertheless not come up short. Shared rooms for meetings, stand-up meeting and project work facilitate personal dialogue among customers and co-workers.

BEST OF BREED: ONLY THE BEST WILL DO

"As a pioneer in the designing of smart work environments, it goes without saying that for the reservation of meeting rooms only a top modern, contemporary solution was conceivable", reflected Reto Metzler, IT Head at isolutions. "We sought a display for room reservations that meets our technical and aesthetic requirements for a smart work environment. In this context, we came across ROOMZ, a tech startup from Switzerland, which has launched a sensational product."

CABLELESS AND FLAWLESS

ROOMZ, the smart e-paper-based display, with wireless hardware which enables it to be attached to the glass panes of meeting rooms, convinced the experts at isolutions. Administration becomes a piece of cake through connection to existing reservation systems: the preconfigured displays log in to the WLAN and show precisely what interests employees: whether a room is free or occupied, and for how long. It also enables spontaneous reservations directly in front of the meeting room. "Staff uses the self-explanatory displays and appreciate that they need not first look on their computer screen to reserve a room. We like the design that is reduced to the minimum. The displays are also easy to operate. The setup with NFC is another highlight," enthused Reto Metzler.

"ROOMZ from the cloud is highly available, scalable and release-capable. Setup is much easier than with conventional solutions; the documentation is very clear. We were surprised at how quickly and easily it all went!"

Reto Metzler, Project Manager and IT Head

CHEERFULLY IN THE CLOUD

As an innovative company, isolutions is very cloud-friendly. The company is also using the cloud option for room reservations with ROOMZ. "We do not have to look after the infrastructure. New features are available automatically, keeping the solution constantly up to date. ROOMZ from the cloud is highly available, scalable and release-capable. Setup is much easier than with conventional solutions; the documentation is very clear. We were surprised at how quickly and easily it all went!"

ROOM EXPERIENCE AS A SERVICE

Relax zone at isolutions

The displays join smart working and the home office option to harmoniously round off the isolutions desk-sharing model. Roman Feierabend, Head of Managed Services at isolutions, is so impressed with ROOMZ, that he also recommends the e-paper displays to his customers: "ROOMZ fits perfectly within our "workplace as a service" concept. A complete room experience as a service can be enjoyed with ROOMZ!" The expert also praises the readability of the displays in the light-flooded isolutions office: "You can read the information on the ROOMZ displays very well from any angle and under any lighting conditions. Not only does ROOMZ improve the usage of our rooms, but also enhances the employee experience."

TECHNICAL SPECIFICATIONS

Format

Dim.: 196 x 165 x 7 mm
(7.71 x 6.49 x 0.27 in)

Weight: 400 g (14.11 oz)

Screen

Grösse: 8"
Auflösung: 1024 x 768 Pixel

Communication

Wi-Fi: 2,4 GHz – Open, WEP, WPA2-Personal (PSK), WPA2-Enterprise (802.1X)

Security: HTTPS, TLS 1.2, Encryption, NFC

Connectivity: NFC, Bluetooth

Battery

Capacity: 7500 mAh
Autonomy: 2 – 4 years
(depending on the usage)
